

Lightweight Manual Sliding Gate

PF9100 Manual Sliding Lightweight Gate

PF9100M

The PF9100 Cantilever Manual Sliding Gate is a lightweight cost effective, low maintenance and practical way of manually controlling access to unauthorised areas.

- The internal roller mechanism ensures a smooth and consistent ease of operation providing a durable and efficient service for years to come.
- The manual gates share the same flexibility as the automatic range offering a vast choice of infill's such as palisade, mesh and customised, which can be easily applied to the gate frame if the standard tubular bar is not suitable for the environment. We can supply the gate in a variety of standard RAL colours to suit the site. Each gate is custom made so we tailor make them to suit the site.
- The gate is delivered as a complete unit and lowered on to pre-installed concrete plinths.
