## **REMOTE CONTROL ROLLER GARAGE DOORS**

*The perfect blend of  
powered operation  
and convenience at  
the touch of a button.*

# Safe, Secure & Convenient

*Discover how the luxury of a Remote Control Roller Garage Door will spoil you forever. You don't even have to get out from the security of your car to open the door.*

Today more than ever before, we need physical security at home and at work to protect against vandalism, burglary or just for privacy and your own peace of mind. We offer the ideal solution, with a door from our Classic, Premier or exclusive Grosvenor laminated woodgrain in golden oak, mahogany and walnut. Our compact roller shutter doors elegantly blend security with the convenience of powered operation, smooth vertical opening and built-in insulation. These doors are perfect for any garage, even if you have arched doorways, minimal head room, or opening on to a short drive allowing you to park right up to the door. Each door can be fully installed in less than a day by our skilled engineers and comply with all European quality standards.

## Innovative features

*You can choose from a safety photo cell or a touch sensitive weather strip on the bottom edge of the curtain to detect an obstacle and return the curtain safely to the open position.*

## Spoilt for choice!

*Full range of colours to suit every application. Choose from our Classic Range which offers a range of colours from White - Brown or Woodgrain. Or why not go for our Premier Range colours include Yellow - Blue - Fir Green - Beige and Red.*

## Extra Security & Peace of Mind

*Customise your door with extra security for holiday periods or extra protection for your special vehicle. Add a courtesy or yard light. Extend your warranty. Have a battery back up unit incorporated in the door, even if the power fails the door will still operate with your remote control for complete peace of mind.*
